TOP 5 THINGS YOU NEED TO KNOW

The 24-speed Shimano RapidFire shifting drivetrain with 48/38/28 Shimano FC-M171 crankset, Shimano RD-M360 rear derailleur, and 11-32t cassette offers a much larger gear range, with much lower gearing, for easier hill climbing, than standard 53/39 or compact 50/34 two ring road bike drivetrains.

Tektro's mini "V" brakes offer stop-on-a-dime braking performance with a power modulator on the front for safe, secure braking.

The Alex rim/Formula hub wheel set is light, but tough, for on or off-road durability, with excellent load carrying capability & handling.

Vittoria's Randonneur 32c tires offer low rolling resistance for a fast ride with more air volume and a wider "footprint" than 25 or 28c tires for a comfortable, confidence-inspiring ride. A "Double Shield" puncture-resistant barrier and reflective sidewalls increase safety and security.

Our Jamis Trekking saddle is broader and more deeply padded than other road saddles, but is still narrow & firm enough to promote higher cadence pedaling.
